PROJECTS AND COMPETITION

ScholarJet Data Science Competitor (April – June 2019)

Competed in a competition where the objective was to predict e-commerce sales from a large training dataset. I built a Python pipeline to clean, analyze, and predict future sales.

Fantasy Football Score Predictor (Feb – April 2018)

Business Intelligence course project where the objective was to build a model to predict NFL Fantasy scores. The project was built using Java, R, Excel and KNime.

Access SQL Restaurant Database Project (Nov – Dec 2017)

Access database project built to categorize restaurants based off of features and attributes in the Worcester MA area. This relational database project utilized SQL querying for a client facing GUI.

RELEVANT WORK EXPERIENCE

ClarkU Marketing Web Editor (Feb 2017 – May 2018)

Built out more than 50 webpages on the current university website. Other duties included customer service to fellow students and staff.

LEEP Fellowship (May 2016 – Sept 2016)

Awarded a \$2500 grant to create an online student guide of the University of Sussex for future USA abroad students. The YouTube videos and website have reached more than 30,000 views.
